Cloud Computing - CSA1514

ASSESSMENT TOOL: 1

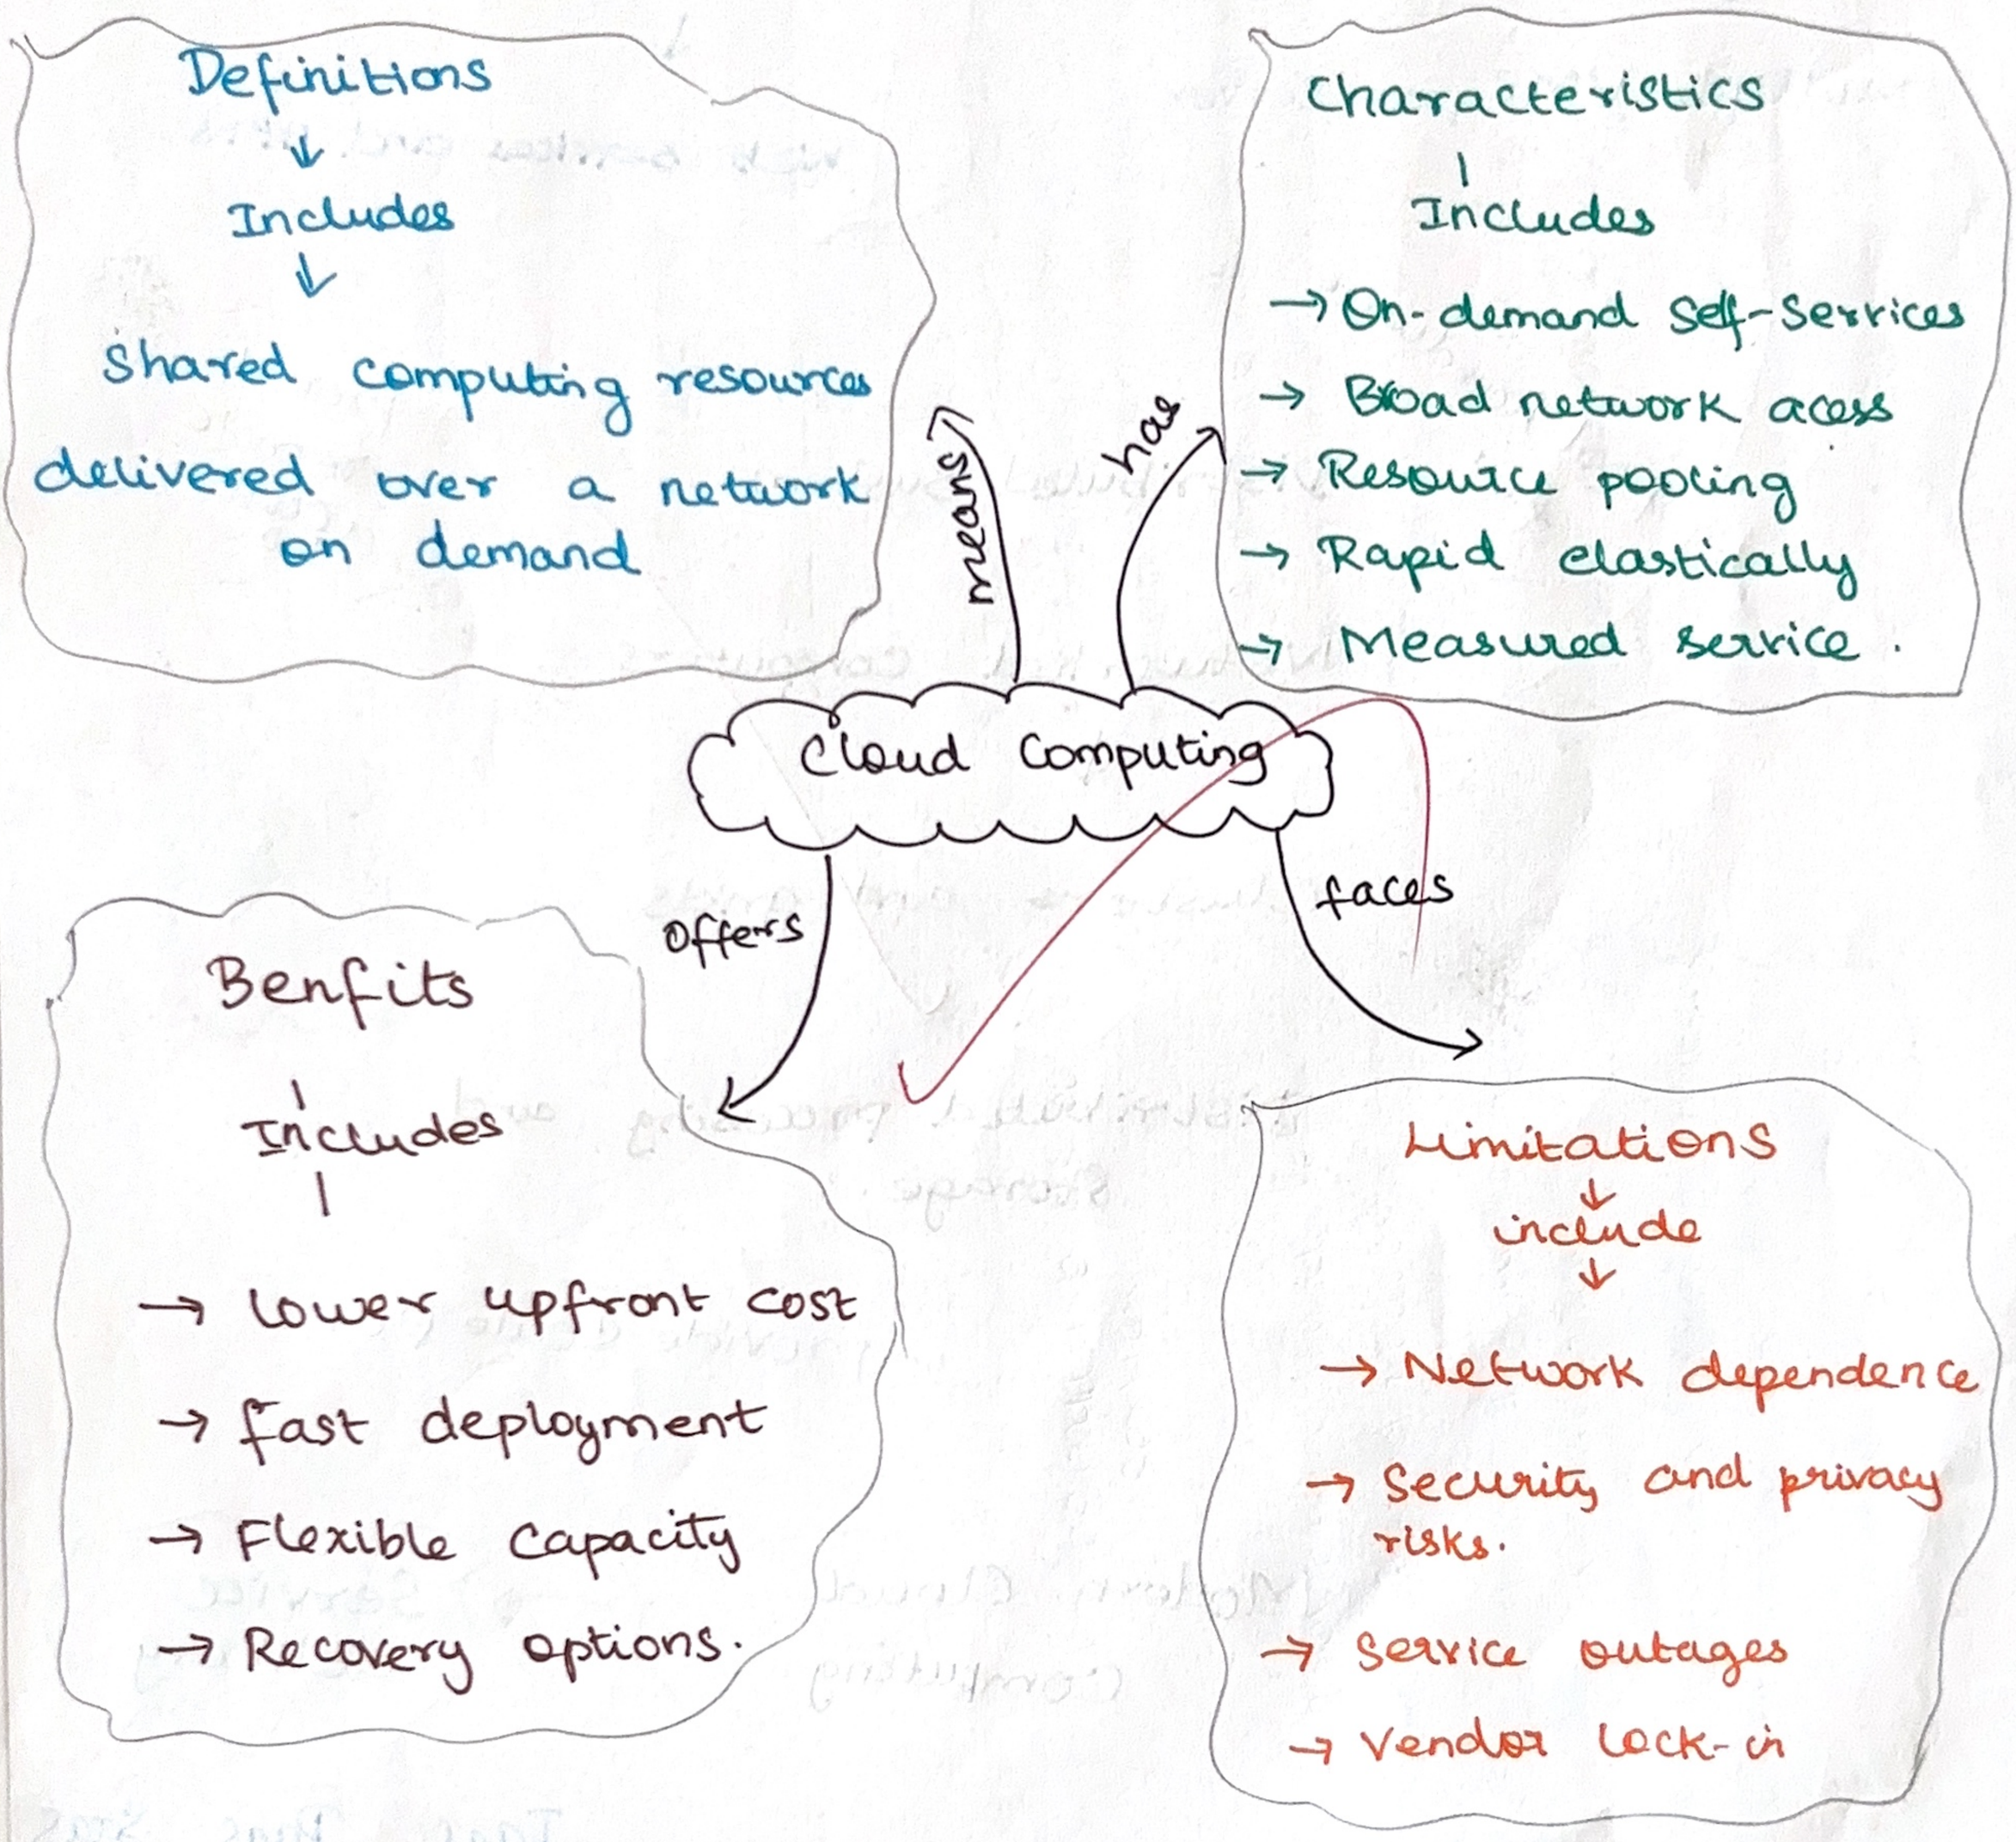

CO-2

Name : Rashmitha Senthil Kumar

Reg NO: 192525034

Branch: B.Tech AIML

Cloud Computing Fundamentals; Include definition, characteristics, benefits, and limitations.

2. Concept Map 2: Evolution of cloud computing. Connect hardware evolution, internet software evolution, distributed systems, and service delivery.

Hardware Evolution

Mainframes and time sharing

↓

Powerful, affordable servers

↓

Multiple VMs per Server

Internet Software Evolution

Internet and web browsers

↓

Web applications

↓

Web services and APIs.

Pool hardware for

Distributed System

Networked Computers

↓

Clusters and grids

↓

Distributed processing and storage.

Provide remote access to

↓ provide scale for

Modern Cloud Computing → Service delivery

IaaS PaaS SaaS

3. Service Models. Map Iaas, Paas, Saas, and xaas with provider responsibilities and user responsibilities.

XaaS - Anything as a Service

umbrella term for IT services delivered On demand

↓

Includes

|

↓

Iaas

Infrastructure as a services

→ Provide virtual servers, Storage and networks

→ physical hardware, network and virtualisation

→ Operating System, middleware application and data

→ Amazon EC2.

Paas

→ Provides Managed application platform

→ Infrastructure operating System, middleware and runtime.

→ Application code, data and access setting

→ Google App Engine.

Saas

Saas Provides

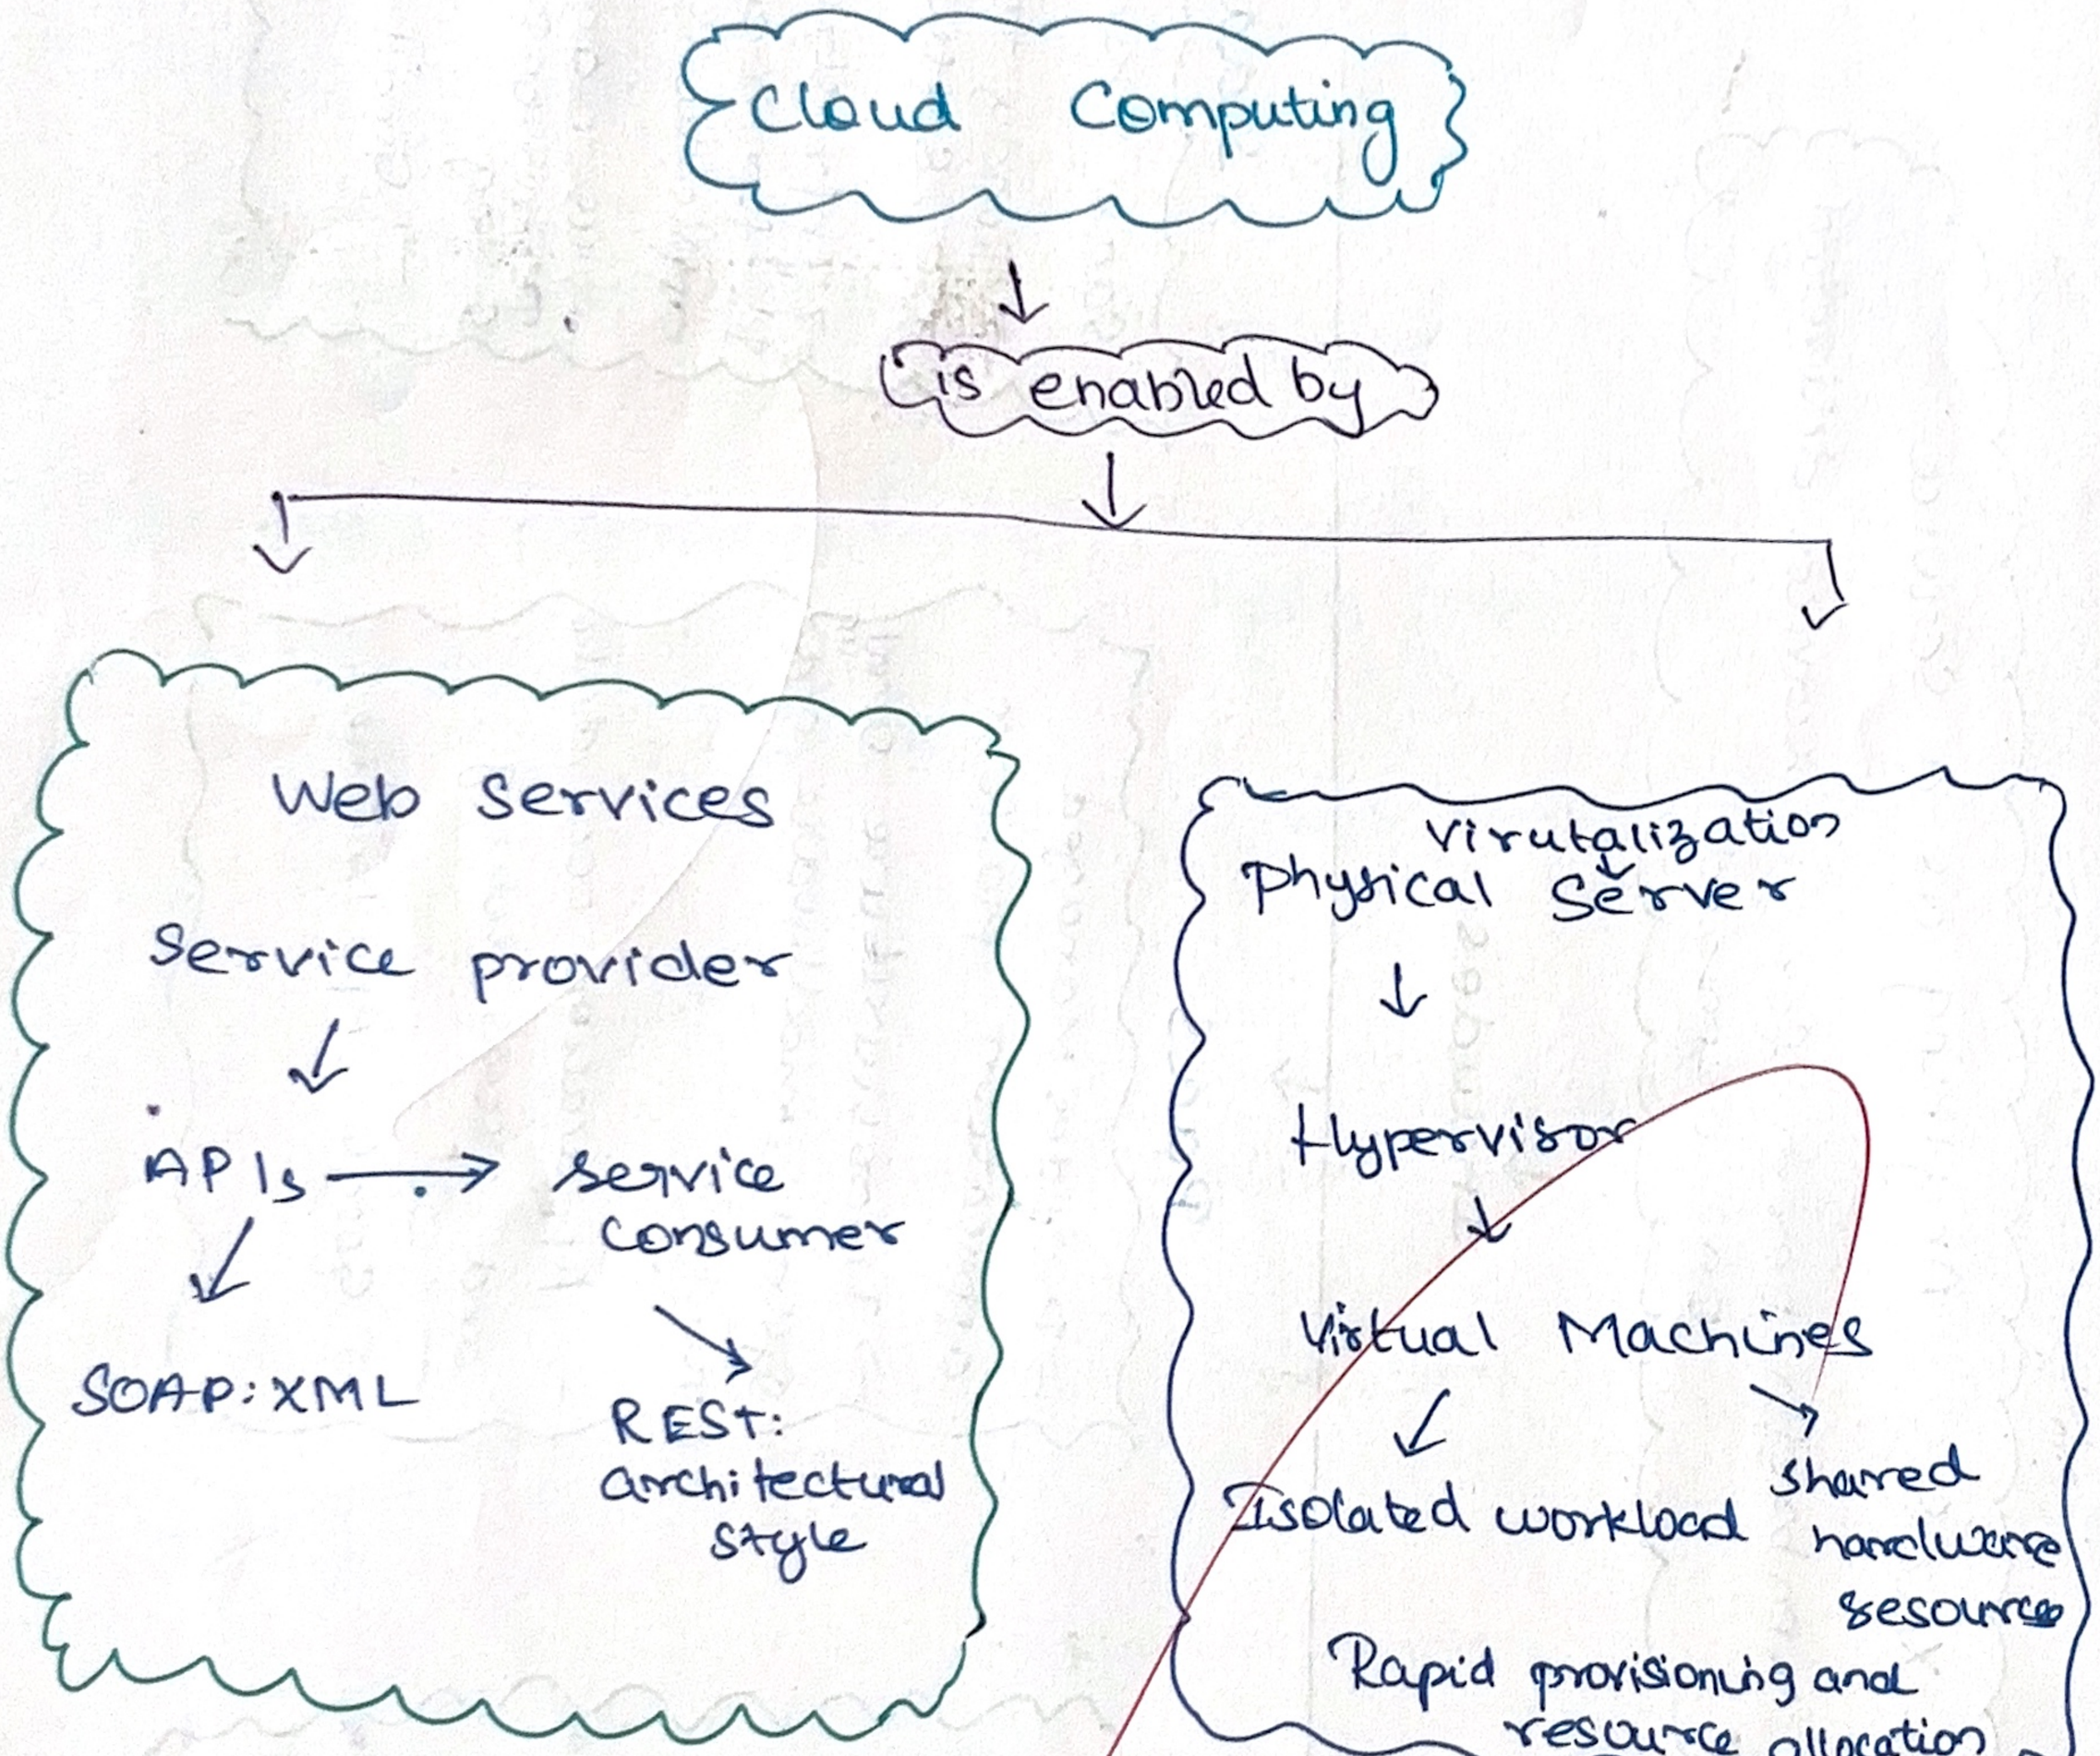

→ Ready to use Software

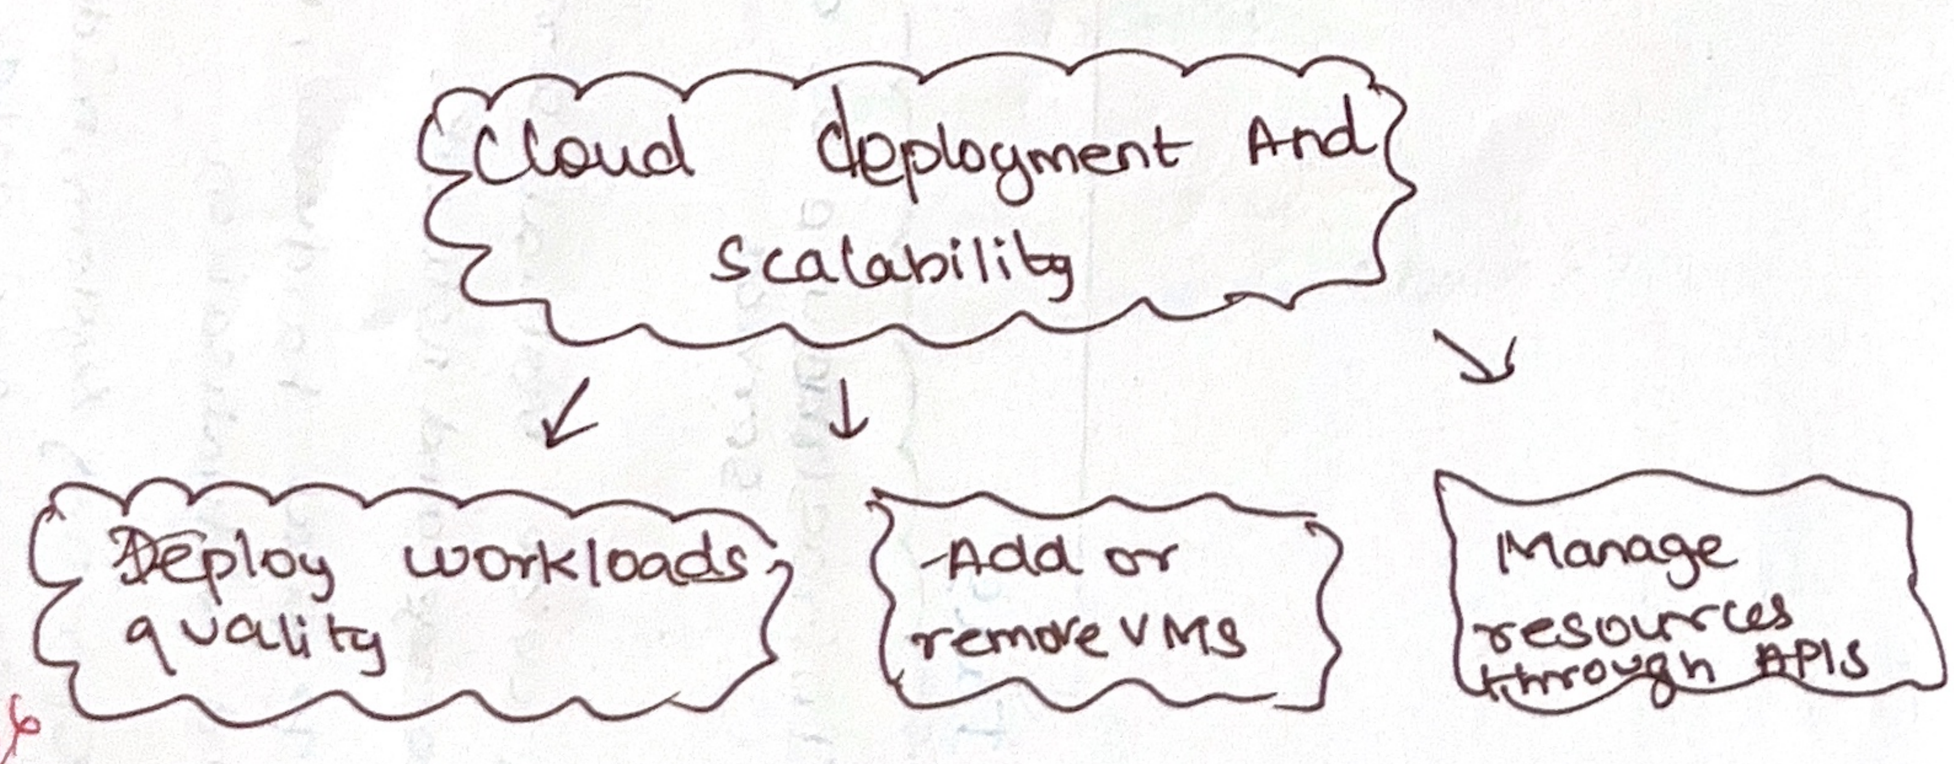

→ Infrastructure platform and applications.

→ user data access permissions and setting.

→ Gmail.

4. Virtualization and Web Services as Enablers of cloud. Show how these two concepts support cloud deployment and Scalability.
